

Certified
Metrology Partner

28th March 2025

Delta XD Appointed as ZEISS Certified Metrology Partner

Delta XD is proud to announce its appointment as the new ZEISS Certified Metrology Partner for the United Kingdom and Ireland. Effective from March 2025, Delta XD will be responsible for the sales and aftercare of the ZEISS 3D testing hardware and software portfolio, including ARAMIS, ARGUS, PONTOS, and TRITOP.

The ZEISS 3D testing portfolio delivers advanced solutions for precise material and component analysis under real-world conditions. These systems provide both 2D and 3D full-field measurements, enabling non-contact evaluation of key dynamic behaviours such as displacement, strain, and vibration. Industries like aerospace, automotive, and advanced manufacturing rely on these tools for deformation analysis, structural testing, and quality assurance. At the core of this technology is ZEISS CORRELATE, a powerful software that transforms high-resolution video imagery into accurate three-dimensional measurement data, offering unparalleled insight into material behaviour.

Finalising the agreement at Delta XD's facility in Basingstoke

Officer, Delta XD

PRESS RELEASE

Brett Adul, Business Development Manager at Carl Zeiss Limited, welcomed the partnership: *"Delta XD brings a wealth of expertise in 3D metrology, making them the ideal partner for our UK and Ireland operations. Their deep understanding of ZEISS technology ensures existing customers receive top-tier support, while new clients gain access to the latest in 3D testing innovation. We are excited about the value this collaboration will bring to the industry."*

Dr Mark Gardner, Chief Executive Officer at Delta XD Limited, commented: *"This partnership is a natural fit for Delta XD, reinforcing our position as leaders in industrial 3D metrology. As long-time users of ZEISS technology—including T-SCAN hawk 2, TRITOP, ATOS, ScanBox, and Stemi 305—we understand the power of these tools. By expanding our capabilities with the ZEISS 3D testing portfolio, we can offer even greater precision, efficiency, and value to our customers. We look forward to integrating these cutting-edge solutions into our sales and services, supporting industries with world-class metrology expertise."*

About Delta XD

Delta XD, a ZEISS Certified Metrology Partner, is a leading provider of precision metrology, inspection, and testing solutions, offering hardware sales, technical services, and precision measurement. Specialising in high-accuracy 3D scanning and reverse engineering, utilising AS9100-certified procedures to enhance quality control and efficiency. With over 25 years of experience, Delta XD brings value using manual and automated solutions, as well as supplying state-of-the-art metrology equipment with expert support for installation, maintenance, repair, and upgrades. Its technical services include Quality Inspection such as FAIR, ZEISS ScanBox programming, and fixture design and manufacturing, ensuring tailored solutions for advanced manufacturing companies. Committed to innovation, precision, and reliability, Delta XD empowers businesses worldwide with expert solutions that drive efficiency, quality, and value.

About ZEISS Industrial Quality Solutions

ZEISS Industrial Quality Solutions is a leading manufacturer of multidimensional metrology solutions. These include coordinate measuring machines, optical and multisensor systems, microscopy systems for industrial quality assurance as well as metrology software for the automotive, aircraft, mechanical engineering, plastics and medical technology industries. Innovative technologies such as 3D X-ray metrology for quality inspection round off the portfolio. In addition, ZEISS Industrial Quality Solutions offers a broad global spectrum of customer services with ZEISS Quality Excellence Centers close to its customers. The company is headquartered in Oberkochen. Production and development sites outside Germany are located in Minneapolis in the USA, Shanghai (China) and Bangalore (India). ZEISS Industrial Quality Solutions is part of the Industrial Quality & Research segment.
